

Allied Wheel Pack Trays and Pallets.

Why purchase both a tray and a lid with other pack designs when you can purchase one product that performs both functions? Our company has developed Wheel Tray designs that are not only compliant to the AIAG's - RC3 specifications but provide a smarter solution to your wheel packaging needs. Returnable Wheel Packs are required by AIAG to be:

- Manufactured from BA50-100 HDPE or equivalent resin.
- Stackable – To utilize vertical storage space.
- Accessible on all four sides of pallet.
- Nestable – For low cost storage and return.
- Compatible with conveyor and automated material handling systems.
- Able to accommodate banding and/or stretch wrap.
- Designed for adequate drainage in all water trap locations.
- Able to accommodate shipping label information – For ease of identification.

Allied Plastics Inc. offers all of that and more:

- Custom molded logos for your specific company information.
- Colored striping for visual pack identification.
- Custom colors of product for visual pack identification.
- Optional Drain Holes for better fluid drainage.
- Hand Holes for easy lifting.
- Wheel size is molded in to the trays for identification.

See the back of this page for more information.
